(54) Title: MOTORIZED TOWING DEVICE

(57) Abstract: A motorized towing device comprising a chassis, at least one motor, at least two wheels, a controller, and a quick release attachment mechanism. The controller operates the motor to cause the rotation of the wheels and the movement of the chassis over a surface. The quick release attachment mechanism releaseably secures the chassis to an object desired to be towed or moved while permitting rotational movement of the device relative to the object about a generally horizontal plane.
